## **AUTUMN LEAVES OF DENTON MARKS GRAND OPENING WITH OPEN HOUSE CELEBRATION AND RIBBON CUTTING**

*Local Specialized Alzheimer's Assisted Living Community Grand Opening Is A Reason To  
Celebrate For An Area In Need of Dedicated Alzheimer's Care Communities*

**Denton, TX – August 26, 2010** – Autumn Leaves®, the area's premier dedicated Alzheimer's and memory care assisted living community, is officially celebrating their Denton community's Grand Opening with an Open House celebration and ribbon cutting on Thursday, September 9, 2010 from 4:00 to 7:00 p.m. The greater Denton area is cordially invited to join company executives, Denton community leaders and other families that have loved ones living with Alzheimer's in officially welcoming Autumn Leaves of Denton to the community. The Grand Opening celebration will begin with the Chamber of Commerce's ribbon cutting ceremony at 4:00 p.m.

Right now the demand for dedicated Alzheimer's care in a long term facility setting far exceeds supply in the Denton area. Many times individuals living with Alzheimer's are no longer able to stay at home and caregivers must begin the difficult task of selecting a long term care community for their loved ones. This choice is often determined by local availability of area facilities able to provide the level of care an individual needs. Autumn Leaves communities are unique in the fact that they are completely dedicated to memory care – meaning that every aspect from design to resident care plans and staff training are modified for individuals living with memory impairment. "We understand how memory impairment affects individuals and this knowledge plays a vital role in the way we develop our communities. We make sure that every element in our system works together to create a secure, home-like environment for our residents", said Cari O'Connor, Community Relations Director for Autumn Leaves of Denton. "Our motto is 'Our Family Caring For Your Family' and we try to instill that in everything we do every day."

Autumn Leaves of Denton provides the following Alzheimer's and Memory Care Assisted Living services:

- On-site licensed nurses with specialized expertise in Dementia Care
- Homes specially designed and built for Alzheimer's/Memory Care Assisted Living
- Life Enrichment Coordinators dedicated to offering dementia-specific group and individual programs
- Dedicated caregivers trained monthly on Alzheimer's and Dementia Care
- Day Stay and Respite Programs with FREE Day Stay Wednesdays

Autumn Leaves of Denton is the ninth property to open in Dallas/Ft. Worth area as part of the Autumn Leaves family of assisted living communities and is located at 2505 Brinker Road, Denton, TX 76208. For more information on the community, the Open House Celebration or to schedule a tour, please contact Cari O' Connor at (877) 713-3162.

**About Autumn Oaks – Independent & Assisted Living Communities**

Autumn Oaks of Corinth is the area's leading Independent Community designed for active individuals and couples age 55 and over who want to maintain an active lifestyle, without the responsibilities of upkeep and maintenance. We provide our residents the convenience of a well-maintained community, fun-filled social activities and the comfort of knowing you are part of our family. Autumn Oaks of Corinth Assisted Living Community provides the best in basic assisted living with personalized assistance, supportive services, and compassionate care. Within our assisted living community our goal is for our residents to remain as independent as possible. Autumn Oaks offers the ideal solution for seniors who need some help with the activities of daily living, as well as housekeeping, meals, and medication management. Family owned and operated, Autumn Oaks is your choice for Independent or Assisted Living in the Corinth area. For more information, visit [www.AutumnOaksLiving.com](http://www.AutumnOaksLiving.com) or call 1-866-229-9634.

**About Alzheimer's Disease**

Alzheimer's disease is a fatal and progressive brain disease that affects over 5.3 million Americans. Currently there is no cure and medications do not stop or reverse the disease. As the most common form of dementia, it accounts for more than approximately 60% of dementia cases.
